

One cool thing you learnt at the workshop?

Ideas for the next workshop?

trainings

more hands-on

More lightning talks

More practical programming sessions.

warm lunch

Dedicated poster sessions

1 min (p.P.) to introduce posters

more break out groups

more capacity building

Ideas for the next workshop?

Document breakout rooms on forum

more time for poster sessions

more workshops to learn stuff (basic or advanced)

Newbies guide - how to get started and contribute to openmod. How to use the forum effectively. How to organise an event. What are the expectations of the community.

Policy relevance

Less slides more working together on programming problems.

Follow-up presentations

More focus on global south (non EU in general)

More break-out groups

Ideas for the next workshop?

archiving model runs

Critical thinking on energy modelling and the question the need for scenarios

More hands on sessions, setting up tasks and groups to solve some of the standing issues of the openmod community

Add discussion or Q&A session after lightning talks.

code sessions

Discussing more work on demand side and sufficiency modeling

trondheim

Data sharr work shop

Science communication how to

Ideas for the next workshop?

Outdoor sessions

Longer Do-a-thons sessions with more involvements

Detailed examples linked to each tool developed

Same amount of breakout groups / lightning talks+On-site tours (research or tourism)

Demand input for energy system models

Engagement with and participation of open energy modellers outside of Europe, particularly global south

for interactive sessions: make expectation from participants more clear

Policy maker involvement

Meat

Ideas for the next workshop?

Speed dating on the first day

More posters

model / code corner with running models

Basic, concise introductions to topics like the ontology workshop

Tutorials for beginners: workflow management, interactive visualisation

systematization of knowledge by themes

Things for new community members: Intro to best practices for open-source modeling and contributions
"State-of-the-models" : what open-source models currently exist

1 day for hackathon after the conference

no meat

Ideas for the next workshop?

Comparison between model features. Example: -
how regions are aggregated in different models. -
different model math syntax (e.g. Calliope vs
Pyomo vs OSeMOSYS)

Q&A lightning talk

No meat is awesome

Longer Breakouts

Intro page where everyone writes a short summary
of what they work on

Gender parity (connectes to Speed dating)

Definitely no meat

step-by-step: how to publish code/data openly

veggie menue was great!

Ideas for the next workshop?

speed dating!

Accessible by train

We can have mostly vegetarian options but at least occasionally some meat options as well. i.e., let's be inclusive and cater to all backgrounds/preferences

Global South perspectives
